Great Learning Academy

## ABOUT ME

I am a passionate and detail-oriented 2nd-year Information Technology undergraduate at SLIIT, with a deep interest in web development and full-stack technologies. Known for being curious and hardworking, I constantly seek opportunities to grow both personally and professionally. I am currently looking for an internship that will help me sharpen my skills, gain real-world experience, and move closer to my goal of becoming a proficient full-stack developer.

## PROJECTS

### WEB SITE - ONLINE JOB PORTAL

SLIIT (2024)

Role: Team Leader (Group of 5)  
Technologies Used: HTML, CSS, JavaScript, PHP  
Server: XAMPP

Description:

Developed a fully functional online job portal as part of a university group project. The system allows users to register as job seekers or employers, post and apply for job listings, and manage profiles. As the team leader, I was responsible for planning the project, distributing tasks, and leading the development of both the frontend and backend using PHP and MySQL. The project focused on creating a user-friendly and responsive design with essential job search functionalities.

### WEB SITE - ONLINE SHOPPING STORE

SLIIT (2025)

Role: Team Leader (Group of 4)  
Technologies Used: JSP, Java, CSS, JavaScript  
Architecture: MVC Pattern  
Server: Apache Tomcat

Description:

Led the development of "Kids wolds," an e-commerce web application focused on kids's fashion. The system allows users to browse clothing items, view product details, and manage orders. Built using the MVC architecture to ensure separation of concerns and maintainable code structure. As the team leader, I coordinated task distribution, implemented core backend logic using Java and JSP, and integrated the project with Apache Tomcat for local deployment and testing.
